Manoj Kumar

DevOps & Platform Engineer · Microsoft Azure · Kubernetes (AKS) · Terraform · CI/CD · DevSecOps

Bengaluru, India · manojkumarm0107@gmail.com · mkthecoder.com · linkedin.com/in/mkthecoder · github.com/mkthecoder-ai

SUMMARY

DevOps and platform engineer building and running secure, production Azure platforms since 2018. Hands-on across the platform lifecycle: Azure Kubernetes Service (AKS), Terraform infrastructure as code, CI/CD in Azure DevOps and GitLab CI with built-in security gates, Azure API Management, private networking and observability. Certified Azure Administrator Associate (AZ-104) and HashiCorp Terraform Associate; working toward the Certified Kubernetes Administrator (CKA).

Core areas: Platform engineering · Cloud infrastructure · Kubernetes operations · Infrastructure as Code · CI/CD automation · DevSecOps · Observability · Production support and RCA · Cost optimisation

TECHNICAL SKILLS

Cloud (Azure)	AKS, API Management (APIM), Container Registry (ACR), Key Vault, Service Bus, Storage Accounts, Function Apps, Static Web Apps, Azure Database for PostgreSQL, Azure Cache for Redis, Microsoft Entra ID, Managed Identity
Infrastructure as Code	Terraform, Azure Verified Modules (AVM), modular multi-state design, remote state, Terraform tests, ARM templates
CI/CD	Azure DevOps (YAML, multi-stage pipelines), GitLab CI, GitHub Actions, Jenkins, Git, reusable pipeline templates
Containers	Kubernetes, Docker, Helm, Dapr, Horizontal Pod Autoscaler (HPA)
Networking	Azure VNet, VNet peering, Private Endpoints, private DNS, NSGs, Azure CNI Overlay, Cilium
DevSecOps	SAST (SonarCloud), dependency and image scanning (Trivy, JFrog Xray), RBAC, secrets management (Key Vault), distroless images
Observability	Azure Monitor, Application Insights, Log Analytics, Prometheus, Grafana, Datadog, ELK Stack
Scripting	Bash, Python, Azure CLI, Linux

PROFESSIONAL EXPERIENCE

CNH Industrial (India) Pvt. Ltd. · Bengaluru — Feb 2023 - Present

Software Engineer II, DevOps & Platform Engineering — May 2025 - Present

Software Engineer I, DevOps Engineering — Feb 2023 - Apr 2025

- Build and operate production AKS clusters: provisioning, upgrades, node pools, autoscaling, isolation and hardening.
- Develop reusable Terraform modules for Azure on Azure Verified Modules (AVM), with a multi-state layout that separates networking, clusters and shared services.
- Design CI/CD pipelines in Azure DevOps and GitLab CI with reusable templates and enforced security gates for code, dependency and container image scanning.
- Manage Azure API Management (APIM): policies, backends, API lifecycle and automated OpenAPI publishing through pipelines.
- Implement private networking with VNets, peering, private endpoints and private DNS for platform services.
- Run observability with Azure Monitor, Prometheus, Grafana and Datadog; support production incidents and root-cause analysis.

Unified Softech · DevOps Engineer

Jan 2020 – Oct 2022

- Designed and deployed Kubernetes-based platforms on Azure for production workloads across client projects.
- Migrated legacy deployments to containerised architectures with Docker and Kubernetes.
- Implemented infrastructure as code with Terraform for repeatable environment provisioning.
- Built CI/CD pipelines that moved release cycles from weekly to daily.
- Introduced observability with Prometheus, Grafana and ELK; cut cloud costs by 20–30% through right-sizing.

Cubespace Technologies · DevOps Engineer

Feb 2018 – Sep 2019

- Managed Azure infrastructure, including virtual machines, networking and storage, for client and internal projects.
- Introduced CI/CD automation pipelines, reducing manual release effort by about 50%.
- Containerised legacy applications, supported Kubernetes deployments, and implemented monitoring and logging.

PROJECT

mkthecoder.com · Portfolio platform, built and run end to end

2026

- Static Next.js site on Azure Static Web Apps (Free tier), provisioned with Terraform: Entra ID-only remote state, budgets with spend and forecast alerts, custom domains with managed certificates.
- CI quality gates on every change: lint, type checks, unit and browser tests, WCAG 2.2 AA accessibility and contrast checks, JavaScript budget and link checks; Terraform tests with mocked providers.
- Protected main branch as code: required checks, code-owner review, squash-only merges, secret scanning with push protection, Dependabot.

Terraform · Azure Static Web Apps · GitHub Actions · Next.js · Playwright · github.com/mkthecoder-ai/portfolio

CERTIFICATIONS

- Microsoft Certified: Azure Administrator Associate (AZ-104) 2026
- HashiCorp Certified: Terraform Associate (003) 2025
- Microsoft Certified: Azure Fundamentals (AZ-900) 2023
- In progress: Certified Kubernetes Administrator (CKA)

EDUCATION

B.E., Electronics & Communication · Don Bosco Institute of Technology, Bengaluru

Aug 2014 – Jun 2018
